Becoming rich with Bitcoin

by **Patrick Frank**

>>> [DOWNLOAD BOOK](#) [Becoming rich with Bitcoin](#)

Maybe you are thinking about, why I've written this book of getting rich without any effort? Wouldn't it be better if I would keep this "secret"?

Well, the answer of this question is very easy. I don't have any advantage if I would keep this knowledge for myself. This thought comes from a society of lack. But in fact this is not true. We get told to think everything in life is limited. But that's wrong. There is enough for everybody! Nobody has to live in poverty. Sure, some countries are exploited by big companies and whole industries and do not really have a fair chance to break out and take part of the wealth of all the industry countries. However, from a global perspective there are more than enough resources for everybody in the world.

Each day, within the financial economy, profit is generated in a scale you cannot even imagine. But this profit doesn't represent the real economy. These two economies are drifting apart faster and faster. I would like to change this, but as long as I'm not able to do this, I can take the chance and benefit from it. Bitcoin is based in the financial economy, so you can make tremendous profit as well. And that's what this e-book is about.

Becoming rich with Bitcoin Patrick Frank

HOW DO I START MINING BITCOINS?

Understanding bitcoins is just one aspect of jumping into the market. How can you make the most of your mining software to earn more bitcoins?

What is Bitcoin Mining?

How did five in your wallet get there? The U.S. government decided at some point to print and distribute it, and every business in the country (and others) agreed to accept it in exchange for goods and services.

Bitcoin mining is intentionally resource-intensive so that the number of blocks found each day by miners remains steady. This mimics the rate of availability of commodities like gold.

So You Want To Become A Bitcoin Miner?

STEP 01 Buy hardware

To begin mining, you have to use either a CPU card, FPGA or ASIC machine. If you're just starting out, an ASIC miner will be best for you.

STEP 02 Download free software

Your computer can become a bitcoin-mining combi, even when you are not at the computer. If you need to mine more bitcoins, you need to buy some hardware. Most popular software: BFGminer, CGminer, EasyMiner.

STEP 03 Get a wallet

You need a bitcoin wallet so you can keep track of and store the bitcoins you make from mining. Make sure you store your address in a safe and secure place and consider making a hard copy to be stored in a secret place. If your computer crashes and you lose access to your bitcoin wallet, you will lose your bitcoins. No one gets them, it is like burning money.

STEP 04 Join a pool

As more and more miners began competing for the limited supply of bitcoins, people found that they were working for months without finding a block and receiving no reward for their mining efforts. This made mining something of a gamble. To even the odds, miners started organizing themselves into pools so that they could share rewards more evenly. Blocks are solved much faster by miners in pools, and bitcoins are distributed according to the amount of work each person put in.

\$942.63
Current market price of bitcoin

186
Blocks mined on a typical day

61,552
Number of transactions on a typical day

7.74 minutes
Time between blocks

25 bitcoins
Reward for discovering a block (the value will drop every 210,000 blocks)

283,344
Total number of blocks discovered
